DETAILED ACTION

Allowable Subject Matter

Claims 1, 3-4 and 6-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Applicant's amendment received January 31st, 2011 adds the limitation requiring the claimed siloxane-crosslinked vinyl-urethane copolymer to be a component of an *aqueous* dispersion.

Mori (JP 2003-238795) is the closest art of record. While *Mori* teaches the general claimed siloxane-crosslinked vinyl-urethane copolymer of the instant claimed invention, *Mori* does not teach this polymer as a part of an aqueous dispersion; in fact, *Mori*'s invention is drawn to a nonaqueous adhesive. As seen in the '795 reference (§ [0069] of the English machine translation of record, the translation obtained from AIPN/JPO website), and explained in applicant's 1.132 Declaration received February 17th, 2011, the only suggestion of adding water to the composition of *Mori* is for the purpose of initiating the hydrolysis of the reactive silicon groups to cure the adhesive, and not for the purpose of making an aqueous dispersion. *Mori* does not teach or suggest making an aqueous dispersion from an otherwise nonaqueous adhesive. It is the Examiner's position that a modification of *Mori* requiring dispersal of the moisture-cured adhesive in an aqueous medium would render the adhesive unsatisfactory for its intended purpose as an adhesive. The art of record does not fairly suggest to a person that a composition exhibiting satisfactory heat/water/weather resistance properties,

Art Unit: 1767

would result from dispersing *Mori*'s composition (which is intended to be a nonaqueous adhesive) into an aqueous environment.

Art found in the field of aqueous vinyl-urethane-siloxane copolymer resins has been added to the record. However, the art made of record neither teaches the vinyl and urethane polymer chains being connected through an intermediary of a silicon-oxygen bond at the terminus of the urethane polymer chain as the instant claim language requires, nor would direct a person having ordinary skill in the art to disperse the nonaqueous adhesive of *Mori* in an aqueous dispersion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: see PTO 892.
